

Standardizing the deployment
of **compliant** security systems
for classified facilities

Convergint value

Convergint is certified to install **UL 2050 CRZH** National Industrial Security Systems across the United States. This complex certification authorizes Convergint to construct, monitor, inspect, and service security systems for classified facilities in alignment with strict U.S. government agency standards.

With a dedicated UL 2050 program management office, Convergint's trained specialists drive **consistent delivery** and reduce cost through standardization. Convergint deploys a reliable and robust process to ensure maximum value, absolute security, and **full compliance** with government regulations.
