# Advanced **artificial intelligence** for security, safety, and operational video analytics
**convergint®**

## Convergint **value**

Convergint partners with **IronYun** to provide Vaidio, an AI-based vision platform that makes existing surveillance infrastructure faster, more accurate, and more intelligent. This solution is an **open software platform** that deploys with any IP camera and integrates out of the box with 28 market-leading video management systems. Vaidio's accuracy, resource efficiency, and functionality reduces costs, minimizes false alerts, and improves operational performance.

Convergint's Digital Transformation team along with IronYun's professional services engineers deliver **scalable, next-generation** AI-enabled video analytics systems, with the commitment of solving customer problems and creating business value.

## Convergint AI-based **solutions**

- Video search
- Intrusion detection
- License plate recognition
- Facial recognition
- Perimeter security
- Vehicle counting

- Temperature detection
- Gunshot detection
