

Enhancing situational awareness with transformative safety and security solutions

Convergint value

Convergint provides robust, automated safety and security solutions that leverage data analytics for comprehensive and immediate **situational awareness**, rapid threat detection, proactive decision making, and more effective response to incidents. By driving data-integrated, **customizable deployments** within existing infrastructure, Convergint's Digital Transformation team builds intelligent Fusion Centers that create more proactive security postures, automate SOPs, and increase speed to response and resolution.

Convergint solutions

- ✓ Artificial intelligence
- ✓ Physical identity & access management
