

Convergint value

Convergint partners with **Genea** to provide **cutting-edge** access control and visitor management systems to **transform and streamline** operations. This cloud-based technology allows admins to access activity across their entire global enterprise or building portfolio, zero-in on access alerts, automate adding and removing users, and provision mobile keys for **heightened security**.

Convergint's team of dedicated experts, along with Genea's professional services engineers, can install this integrated, fully customizable solution with the commitment of providing best-in-class **property technology**.
