convergint®

Automated and unified identity managment for physical and logical access systems

Convergint **value**

Convergint's **physical identity and access management** solutions allow organizations to control access based on the role, policy, or attribute level for every employee, customer, contractor, or visitor.

Convergint's **team of experts** can integrate this system, helping organizations leverage real-time business intelligence to develop risk scores, improve health and safety in the workplace, and **ensure compliance** across training modules, COVID tracking, and NDAs.

Convergint **solutions**

- ✓ **Unify security databases to automate, simplify, & manage risk**
- ✓ **Leverage real-time business intelligence**
- ✓ **Create workflows to issue access rights**
- ✓ **Update physical & logical databases**
- ✓ **Enhance user experience**
- ✓ **Automate data entry**
