# convergint®

Leveraging open platform
**video surveillance** to
future-proof security

## Convergint **value**

Convergint partners with **Milestone Systems**, a global leader in open platform IP-based solutions, to provide access control, video management, and perimeter detection services. With extensive industry knowledge and **certified specialists** around the globe, Convergint has the experience and skills to handle complex technology integration with Milestone's solutions.

With **customizable systems** and flexible deployment options, organizations of all sizes can future-proof their security systems by migrating to an **IP-based** system that leverages existing cameras. By seamlessly integrating mission-critical video management systems, security teams can proactively protect people, buildings, and assets.
