convergint®

Reimagining **physical security** for empowered decision making with **cloud-managed IoT**

Convergint **value**

Convergint partners with **Cisco Meraki** to deliver a highly scalable, intelligent, and agile IoT and physical security platform that empowers entities with the visibility and data they need to protect and secure what matters now and in the future. This transformative platform enables the convergence of IT, **physical security**, IoT, and an ecosystem of API software to create operational efficiencies through automation.

With simple architecture and **flexible deployment** options, entities of all sizes can **future-proof** security with IoT-integrated managed video surveillance, eliminating barriers between the digital and physical world.

Convergint **solutions**

- ✓ **Real-time visibility from anywhere**
- ✓ **Secure by default, ethical by design**
- ✓ **Intelligence that adds value**
- ✓ **Simple, scalable architecture**
- ✓ **Cloud-managed security**
- ✓ **Open-platform**
