

Convergint value

The shipping industry, a pioneer in technological advancements for efficiency, sustainability, and safety, has undergone **remarkable transformations** in recent years. However, the integration of AI and video analytics remains largely untapped.

Convergint's Smart Vessel solution harnesses the power of artificial intelligence, machine learning and intelligent surveillance to customize analytics software that detects key vessel events. It delivers real time threat detection, predictive maintenance, cargo monitoring, fuel efficiency optimization, regulatory compliance and improved employee safety—all in support of **improved security and operational efficiencies**.

Convergint solutions

- ✓ Integration with video surveillance
- ✓ Customized AI analytics software
- ✓ Integration with alarm systems
- ✓ Intelligent surveillance
- ✓ Artificial intelligence
- ✓ Machine learning
