Convergint Technologies Subprocessors

In the significant majority of Convergint's customer engagements, Convergint's role as a processor of personal information is limited to accessing or processing such information on the customer's own information systems or on third-party systems designated or controlled by the customer. Convergint does not typically transfer or store customer-controlled personal information onto Convergint's own information systems.

In situations where such personal information is transferred onto Convergint's own information systems, Convergint may utilize subprocessors for certain processing activities as set forth below. In addition, other subprocessors not listed here may be used with notice to you. Please contact your Account Executive for additional information on subprocessors being utilized for your services.

Entity Name	Purpose	Entity Contact Information
Microsoft Corporation	• Azure Cloud Hosting Services • Microsoft 365 Services	Microsoft Trust Center
Checkpoint	• Email security	Checkpoint Support Center
Commvault	• Disaster recovery	Commvault Trust Center

Please note that Convergint is an authorized distributor or reseller, and not the manufacturer, developer, or provider ("OEM") of products and certain services that you may obtain from Convergint ("Third Party Products"). These OEMs are not Convergint's subprocessors, and instead may be independent processors whose processing is governed by any applicable end user licensing agreements, terms, or data processing addendum(s) between you and them. Convergint is not responsible for the privacy or data security practices of OEMs or Third Party Products.

For more information about Convergint's privacy practices, please see https://www.convergint.com/privacy/. You may also contact dataprotectionofficer@convergint.com with questions about Convergint's subprocessors or privacy practices.

If you would like to subscribe to receive updates to the list of subprocessors, please send an email to dataprotectionofficer@convergint.com with the subject line "Subprocessor Updates" and specify your desired notification email address(es) in the body of your message.
