

Secure, private, and frictionless Facial Authentication for Access Control

convergint®

Convergint **value**

Convergint partners with Alcatraz to deliver facial authentication solutions that combine enterprise-grade security, strong data privacy, and seamless user experience. Alcatraz integrates natively with existing **access control systems, no middleware or complex configuration** required. The platform enables effortless enrollment and touchless authentication while offering advanced features like tailgating detection and continuous software updates for future-ready protection. Designed with privacy at its core, Alcatraz helps organizations meet regulatory requirements including BIPA, CCPA, and GDPR. Authentication occurs at the edge, with no sensitive data transmitted or stored centrally, and all end-users opt in with clear consent ensuring both compliance and trust.

Convergint **solutions**

- ✓ Easy implementation
- ✓ Premium user & admin experience
- ✓ Edge computing
- ✓ Detect & prevent tailgating
- ✓ Fast & secure authentication
- ✓ Prevent security breaches & mitigate risk
- ✓ Reduce security infrastructure
