AXIS®
COMMUNICATIONS

Better together. Safer schools. Smarter solutions.

A unified, open solution
for K-12 environments

Convergent, Genetec, and Axis help districts create a more connected security ecosystem by bringing network devices, data, and operations together into one optimized experience.

Convergent assesses, designs, deploys, and supports the district program today and into the future

Genetec provides the unified operational platform that brings video, access control, communications, alarms, and analytics together in one interface.

Axis delivers secure, purpose-built network devices including video, audio/intercom, access control, and intelligent analytics

The Convergent | Genetec | Axis advantage

Unified platform	One interface provides visibility for video, access control, communications, alarms, and workflows.
Flexible deployment	Protect existing investments and choose cloud, on-premises, or hybrid, determined by site and needs.
Cybersecure by design	Network device security plus Genetec cyber protections keep your data and systems safe.
Open architecture	Integrate best-in-class solutions and protect existing investments as you modernize.
Expert delivery	Convergent designs, deploys, trains, and supports your program at scale.
Better daily operations	Reduce complexity, speed response, and improve outcomes for students and staff.

A unified solution that grows with your district.

Designed to support the people, the processes, and the culture that supports the whole school community.

For district leaders

Strengthen safety, communications, and operational readiness across your schools.

For IT leaders

Reduce complexity, secure your systems, and modernize with confidence.

For schools

Create safer learning environments where students and staff can thrive.

For communities

Protect what matters most, together, today and for the future.

Solution capabilities

- | | | |
|---|-------------------------|--|
| ✓ | Genetec security center | Unified video, access, ALPR, communications, alarms, and workflows |
| ✓ | Security center SaaS | Cloud native operations with deployment flexibility |
| ✓ | Axis technology | Cameras, audio/intercom, access control, and analytics |
| ✓ | Axis cybersecurity | Secure boot, signed OS, device identity, and protected storage |
| ✓ | Open integration | Visitor, intrusion, vape detection, duress, and partner systems |

Let's start the conversation

Convergint will assess your environment, align it to your priorities, and build a roadmap that delivers safer schools and simplified operations.

Effective security and safety is a multi-layered approach involving people, processes, and technologies. Convergent-provided products and services are only one part of this approach, will not detect or prevent all threats or solve every risk, and should not be the sole method of security or safety. See the "IMPORTANT PRODUCT SAFETY AND SERVICE INFORMATION" at convergent.com/terms before using a Convergent-installed system.
